

# ARE YOU TRAVELLING FOR HAJJ OR UMRDAH?+++

Visit your Healthcare Professionals at least 6 weeks prior to travel<sup>1</sup>

- CATMAT Vaccine recommendations for Canadian travellers states that the meningococcal vaccine recommendations vary by characteristics of the travellers and the travel destination.<sup>2\*</sup>
- The MOH of the Kingdom of Saudi Arabia requires individuals planning to travel for Hajj or Umrah to meet the following vaccination requirements:
  - A meningococcal quadrivalent conjugate vaccine received within the last 5 years and at least 10 days prior to arrival in Saudi Arabia,<sup>2,3</sup> or
  - A meningococcal quadrivalent polysaccharide vaccine received within the last 3 years and at least 10 days prior to arrival in Saudi Arabia<sup>2,3</sup>

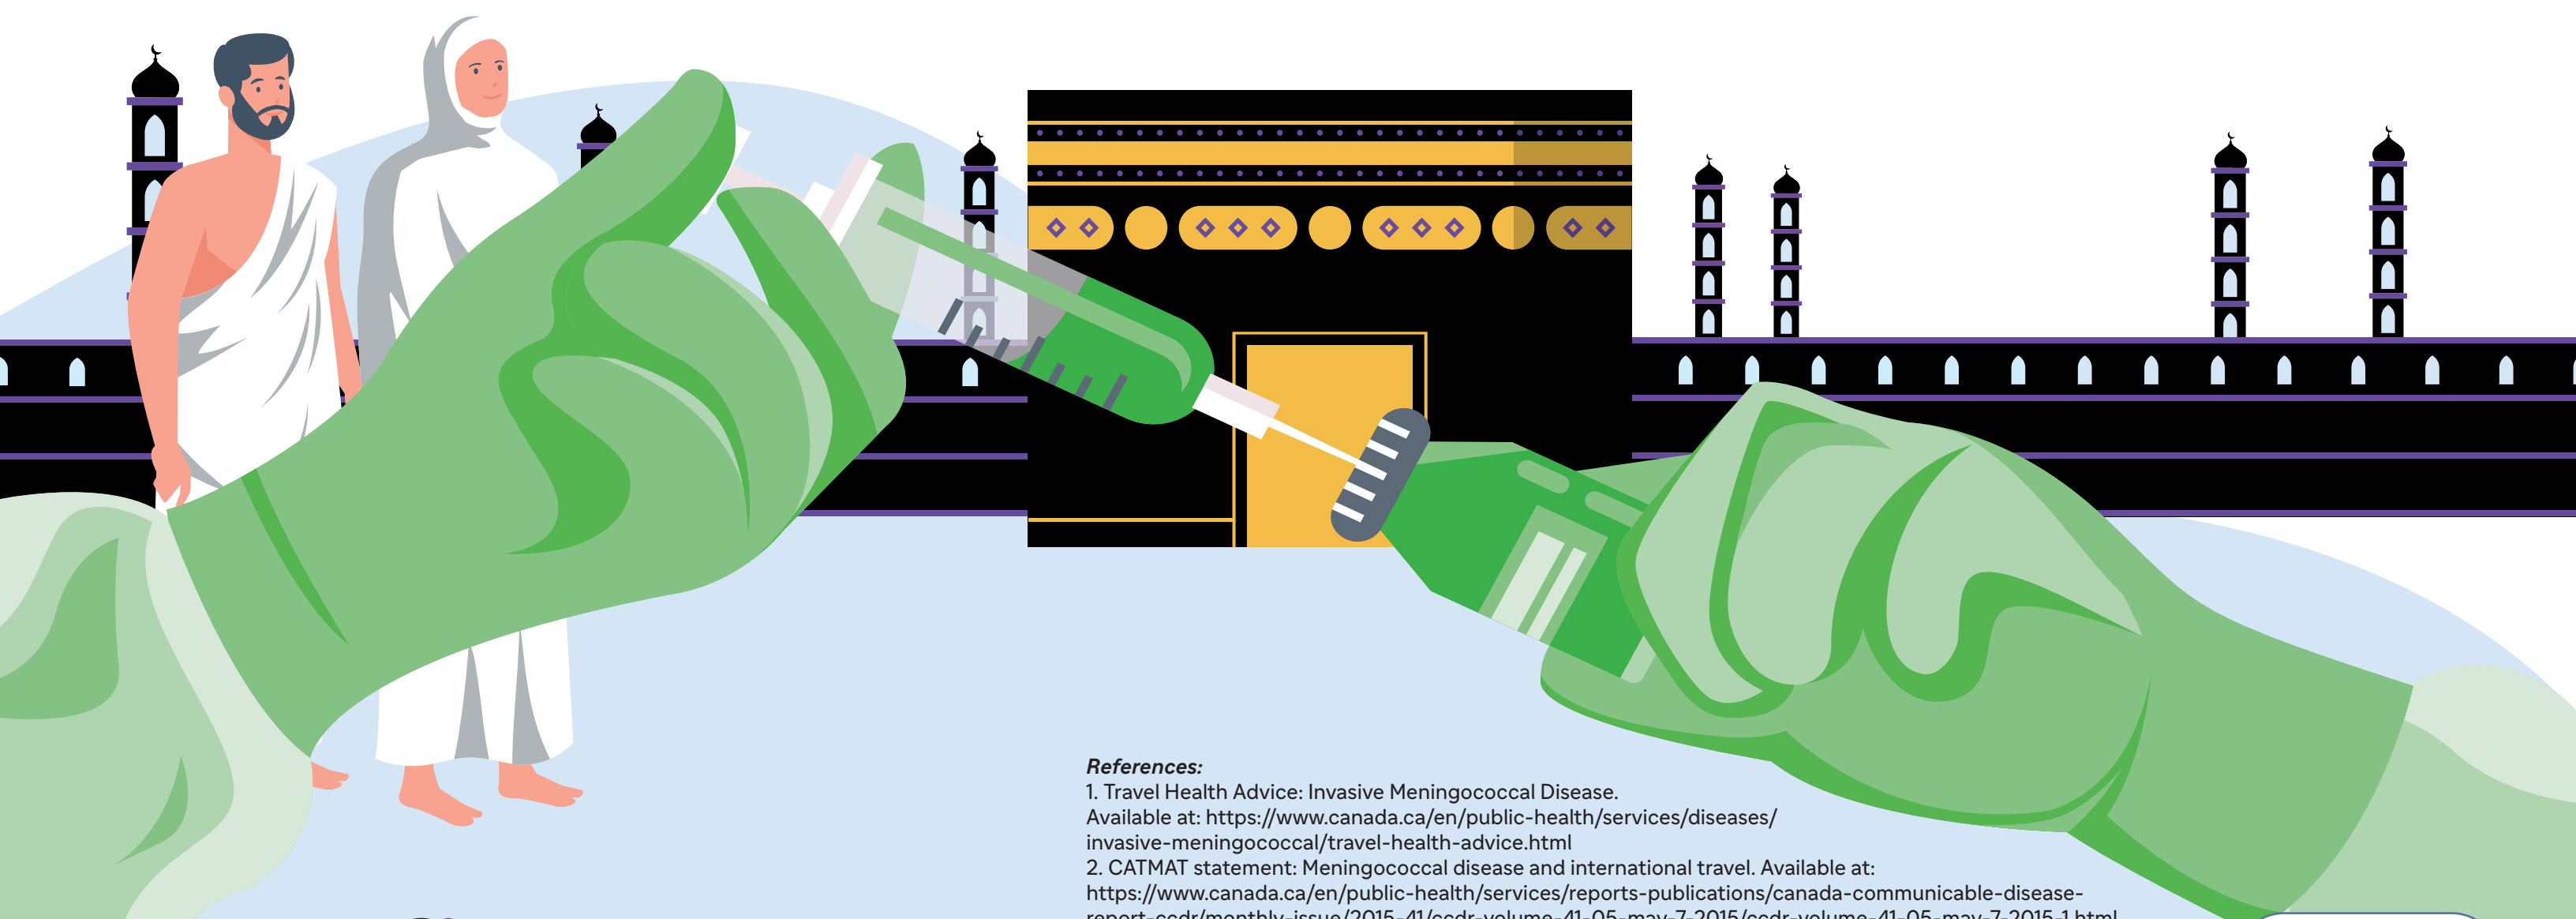

## Ask your doctor about MenQuadfi®

- MenQuadfi® is indicated for active immunization for the prevention of invasive meningococcal disease caused by *Neisseria meningitidis* serogroups A, C, W and Y in individuals 12 months of age and older<sup>4</sup>  
MenQuadfi® does not prevent *N. meningitidis* serogroup B disease.<sup>4</sup>

Vaccines do not provide 100% protection. Please consult the MenQuadfi® Product Monograph, which includes the complete Patient Medication Information, at <https://www.sanofi.com/assets/countries/canada/docs/products/vaccines/menquadfi-en.pdf> to ensure MenQuadfi® is suitable for you. The Product Monograph is also available at 1-800-265-7927.

\*MenQuadfi® was not included in the CATMAT guidelines as it was not available for consideration when the guidelines were published.
